Summary

Full-Stack Developer and Computer Science undergraduate with hands-on experience building scalable, production-grade web applications using React.js, Next.js, Node.js, and PostgreSQL. Designed and deployed an AI-powered real-time interview platform using LiveKit and LLMs. Strong foundation in data structures, backend systems, real-time communication, and end-to-end product development. Seeking Software Engineer (SDE-1 / New Grad) opportunities for 2027.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java
Frontend: React.js, Next.js 15, Tailwind CSS, shadcn/ui
Backend: Node.js, Express.js, RESTful APIs, WebSockets, LiveKit Agents
Database & ORM: MongoDB, Mongoose, Prisma ORM
Tools & Platforms: Git, GitHub, Vercel, Render, Postman, Vite

Experience

Rixi Labs

October 2025 – November 2025

Web Development Intern

Remote

- Delivered production-ready MERN stack features across multiple client projects within weekly sprint cycles, building reusable **JWT authentication** middleware adopted across all new modules.
- Built dynamic, responsive **React.js** UIs with component-driven architecture and managed end-to-end deployments via **Git**, **Render**, and **Netlify**.

Education

CMR College of Engineering and Technology

Bachelor of Technology in Computer Science and Engineering

Hyderabad, Telangana

C.V. Raman Junior College

Intermediate (MPC)

Wanaparthy, Telangana

Projects

Evalnyx — AI Interview Coach | Next.js 15, TypeScript, LiveKit, Prisma, PostgreSQL, Tailwind CSS

2025

- Built a full-stack AI-powered mock interview platform with a **dual-agent LiveKit architecture**
- Implemented end-to-end secure authentication (**email verification**, JWT session guards, route-level middleware) and a post-interview analytics report with overall, technical, and communication scores, strengths, weaknesses, and **PDF export** — persisted via **Prisma ORM** on **PostgreSQL**.

Real-time Chat Application | MongoDB, Express.js, React.js, Node.js, Socket.IO, JWT, bcrypt

2025

- Built a real-time messaging platform using **MERN** and **Socket.IO** supporting private and group chats with live presence indicators via persistent WebSocket connections and **JWT**-secured socket events.
- Optimized **MongoDB** queries with compound indexes on conversation ID and timestamp, improving message retrieval performance for high-volume concurrent chat sessions.

Restaurant Management System | React.js, Node.js, MongoDB, Vite, Material UI

2025

- Developed a responsive restaurant web application in **React.js** with **Vite**, featuring dynamic components for menu browsing, service showcasing, and order interaction with a mobile-first **Material UI** design system.

Achievements

LeetCode: Solved **116+** problems spanning arrays, strings, dynamic programming, binary search, and sliding window [Profile](#)

CodeChef: Solved **565+** problems and participated in **25 rated contests**; earned **Gold Problem Solver** and **Diamond Daily Streak** badges

[Profile](#)

Combined DSA Problem Count: **681+** problems solved across LeetCode and CodeChef demonstrating consistent algorithmic problem-solving practice

Certifications

ServiceNow Certified Application Developer (CAD), ServiceNow

2026

ServiceNow Certified System Administrator (CSA), ServiceNow

2026

Python Essentials 1 — Batch 1, Cisco Networking Academy

2026

Networking Basics, Cisco Networking Academy
